October 24, 2016

To Our Neighboring Landowners,

You were previously notified that ITC Midwest LLC (ITC Midwest), with its principal place of business at 123 5th Street SE, Cedar Rapids, Iowa, 52401, is proposing to rebuild a 34.5kV transmission line to 69kV standard in Linn County, Iowa. Included with that mailing was a map of the proposed route for your reference. The proposed route on the map did not accurately depict where the line is currently being routed, so an updated map is included with this letter that shows the correct location of the proposed line. The final route within the identified corridor will still be determined when easement negotiations with landowners are complete.

As a reminder, an informational meeting will be held at 5:30 p.m. on December 7, 2016, at the Lisbon City Hall, 115 N. Washington Street, Lisbon, Iowa, where details of the project will be presented along with a summary of the legal rights of affected landowners. Time will also be allocated to answer questions about the project. The meeting should last approximately an hour. In the event of inclement weather (as determined by the cancellation of school/classes in the Lisbon Community School District on the morning of the date of this Informational Meeting), the meeting will be held on December 14, 2016, at 5:30 p.m. at the same location. Under Iowa law, ITC Midwest is not allowed to negotiate easements before the meeting on December 7, 2016. Please join us at the meeting for additional discussion regarding the purpose, timing and routing of the proposed line.

Please contact Jacob Shipp at (319) 297-6816 or jshipp@itctransco.com if you have any questions concerning this notice prior to the meeting.

Sincerely,

A handwritten signature in cursive script that reads "Tim Tessier".
